GMT database systems  
sixth edition ramez pdf -

First normal form (1NF) is a property of a relation in a relational database. A relation is in first normal form if and only if the domain of each attribute contains only atomic (indivisible) values, and the value of each attribute contains only a single value from that domain. The first definition of the term, in a 1971 conference paper by ... First normal form -

Wikipedia - A newly released study, produced with help from eight universities, found some good news. Between 1993 and 2009, the global impact of human activities on the terrestrial environment is expanding more slowly than the rates of economic and/or population growth.
