GMT inorganic chemistry  
miessler 3rd solutions pdf -

In chemistry, a coordination complex consists of a central atom or ion, which is usually metallic and is called the coordination centre, and a surrounding array of bound molecules or ions, that are in turn known as ligands or complexing agents. Coordination

complex - Wikipedia - An acid dissociation constant,  $K_a$ , (also known as acidity constant, or acid-ionization constant) is a quantitative measure of the strength of an acid in solution. Acid dissociation constant - Wikipedia -
