Sun, 18 Jan 2015 23:53:00 GMT Analysis of Lignin Aromatic Structure in Wood Fractions ... - Lignin structural analysis indicated GTP processing resulted in extensive degradation of \hat{I}^2 -aryl ether bonds through the C-elimination, followed by abundant phenolic hydroxyl liberation. At the same time, condensation occurred in the GTP lignin, providing relatively high molecular weight, near to that of the enzymatic mild acidolysis lignin. Better thermal stability was observed for this GTP ...
